ONUR ÇELIKLER
SOFTWARE ENGINEER

Profile

I am a new graduated Software Engineer from Bahcesehir University with eager to become a good Front-end Engineer with good UI/UX knowledge. I started learning software to develop games but later I found my passion on front-end development.

Skills

HTML, CSS, JavaScript, ReactJS, NodeJS, Bootstrap, Python, C#, Photoshop

Experience

Argenova
SOFTWARE INTERN | August 2022 - September 2022
Worked under the Intern Project of the company. Which lead me to create a donation web application. I gained experience about problem-solving, presenting of a project and software knowledge.

MediaMarkt
IT INTERN | June 2019 - July 2019
I had the opportunity learn about ASP.NET due to my C# knowledge, CSS and Bootstrap there. And also gained offfice working environment experience.

Education

SOFTWARE ENGINEERING
Bahcesehir University, Istanbul | September 2016 - October 2022
On my university, I learned Java, C# and Python as programming languages and I gain knowledge about Software Architectures, Validations, Project Management, Analysis and Design

ENGLISH
Oxford International, Brighton | July 2017 - September 2017
In my two month journey I experienced living in another country, improving my English with interacting people and learned about English culture.

Additional activities

FIFA Community Manager and Coach
On my university's esport club, I have founded FUT and Pro Clubs teams and organized tournaments for the students on the club. From those students I filled my teams with players we competed on many organizations and won championships and promoted on leagues.
